

Flight Control

User Manual

Who owns an airliner, do not performs random flights, the company has a schedule of dates and times where each plane carries its flights in an organized and pre-defined way. The **Flight Control** was designed precisely in order to organize and pre-set flights to the commanders who use Flight Simulator as well as the virtual airlines. With a simple and intuitive interface, the **Flight Control** allows the user to create, define and change dates, flight times and users. We will explain, step by step, how to enjoy all the features of the **Flight Control** from Spilfred.com.

1. Access the <http://www.spilfred.com> page.
2. In main page click on "Create User" menu.

3. Type the user name in the field "User Name".
4. Type the a password in the "Password" field and type it again in the "Confirm Password" field.
5. Type the user e-mail address in the "E-mail" field. The e-mail will be useful in case of a forgotten password.
6. Type the security question in the "Security Question" field. The question whose answer should be something that is easy to remember. i.e: Favorite movie.
7. Enter the secret answer in the "Security Answer". In case of forgotten password, the system before sending the new password for the user's e-mail will ask the security question and the user must enter the answer. If the response matches what was entered when creating the user, a temporary password will be sent to the registered e-mail.
8. Click on "Create User".

SpilFSP - FS2004 Flight Control

If you use the FS2Crew or any other software where the voice of the FS2Passengers flight attendants are overlapping, this software is for you. Just select your aircraft in Flight Simulator when active will silence the voice of the flight attendants. The SpilFSP also provides an increase in the amount of boarding/unboarding songs in FS2Passengers, now you are not limited to just five songs and always in the same sequence. [Read more and download here.](#)

Flight control is a database in which virtual airlines can take a record of their flights and users. The Company can create three levels of users: Admin, Sub-Admin and viewer. The Admin user is generated in the company's inception. It can create and change flights and users. The Sub-Admin is created by Admin and can create and change flights, but no users, and the viewer that can be created by the Admin or Sub-Admin and can only see the existent flights. The flight control works in [windows and linux and can be created](#)

11. On the main page the user will have access to the following:

In this page you can create, change, delete and search your flights.

DEFAULT

Flight:

Departure Airport: Departure City: Departure Time:

Destination Airport: Destination City: Duration:

Days: Sunday Wednesday Friday
 Monday Thursday Saturday
 Tuesday Friday

Aircraft:
Fuel:
Obs:

[Create](#) [Change](#) [Delete](#) [Clear](#) [Search](#)

Status: 0 Flights Found.

From top to bottom:

- The blue band with the text "Default": It appears where the name of your virtual company (will show how to change later).
- The "Flight" field: Shows the Flight number.
- The navigation buttons: "<<": Shows the first flight, "<": Shows the previous flight, ">": Shows the next flight and ">>": Shows the last flight.
- The "Departure Airport" field: Displays the ICAO code of the departure airport.
- The "Departure City" field: Displays the city's and the country of the departure airport.
- The "Departure Time" fields: Displays the hours and minutes of the scheduled departure.

- The "Destination Airport" field: Displays the ICAO code of the destination airport.
 - The "Destination City" field: Displays the city's and the country of the destination airport.
 - The "Duration" fields: Displays the hour and minute of the expected duration of the flight.
 - The "Days" checkboxes: Display the days when the flight occurs.
 - The "Aircraft" field: Displays data related to the aircraft used for flight.
 - The "Fuel" field: Displays data related to the amount and use of fuel.
 - The "Obs" field: Displays additional information and comments about the flight.
 - The "Create" button: When pressed creates the flight on database of the company.
 - The "Change" button: When pressed save changes made in the flight.
 - The "Delete" button: Delete the Flight from database.
 - The "Clear" button: Clear all fields in page.
 - The "Search" button: Search flights that meet the selected criterias.
 - The "Status" text: Displays information on the establishment and number of flights.
12. To create a flight, first enter its code in the "Flight" field (i.e. S0143).
 13. Type in the "Departure Airport" field the ICAO airport code (i.e. SBGR).
 14. Note that once you click off the field "Departure Airport" will automatically appear the name of the city and the country in the "Departure City" field.
 15. Enter the hours and minutes for the departure in the "Departure Time" (i.e. 10 : 45).
 16. Similarly fill the "Destination Airport" (i.e. Klax) and "Duration" (i.e. 13 : 50).
 17. Click on the days that the flight will occur (i.e. Sunday, Wednesday e Friday).
 18. Type in the "Aircraft" field the data relating to aircraft (i.e. Boeing 747-400...).
 19. Type in the "Fuel" field the data relating to fuel (i.e. 35.000 Kgs...).
 20. Type in the "Obs" comments you want about the flight (i.e. A87223...).
 21. Now just click in the "Create" button. Your flight was created.

The screenshot shows the SPILFRED.COM web interface for creating a flight. The form is titled "DEFAULT" and contains the following fields and values:

- Flight: S0143
- Departure Airport: SBGR
- Departure City: SAO PAULO - BRAZIL
- Departure Time: 10 : 45
- Destination Airport: KLAX
- Destination City: LOS ANGELES - UNITED STATES
- Duration: 13 : 50
- Days: Sunday, Wednesday, Friday
- Aircraft: Boeing 747-400 / F-GQBC
- Fuel: 35.000 Kgs / 100%L, 100%R, 30%C
- Obs: A87223, LUAL842

The "Create" button is circled in red, indicating it is the next step in the process.

22. Do the same to create as many flights as you want.
23. If you need to change any data of a flight already created, simply change the desired field and click the "Change" button.
24. The "Delete" button when pressed, erase the flight on display.
25. To clear all fields, click the "Clear" button.
26. To search for a flight, put the data to the form and click "Search".
(i.e. 1. To filter all flights departing from SBGR: Click the "Clear" button to clear the fields and then enter SBGR in the "Departure Airport" field, wait for the city and the country appears in the "Departure City" field and click "Search" button. The text

- "Status" will show how many flights departing from SBGR are registered. To see what flights there click on the navigation buttons: "<<", "<", ">", ">>".)
- (i.e. 2. To filter all flights that occurs in "Sunday" and "Friday": Click the "Clear" button to clear the fields and then click the days "Sunday" and "Friday" checkbox in the set of "Days" and click "Search button. "In the text "Status" will show exactly how many flights occur on selected days. To see what flights was filtered click the navigation buttons: "<<", "<", ">", ">>".)
27. To list all the company's flights, place your mouse over the menu "**Flight Control**" and when the list appears click on "Flights List".
 28. Will be listed in summary form, all the company's flights. Click on the word "Select" to display the flight on the main page of **Flight Control**.

Flight	Dep	Dep	Dest	Dest	Dep	Dep	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Select	SBGR	SAO PAULO - BRAZIL	KLAX	LOS ANGELES - UNITED STATES	10:45	13:50	<input type="checkbox"/>						
Select	JFK	NEW YORK - UNITED STATES	KLAS	LAS VEGAS - UNITED STATES	20:50	02:30	<input type="checkbox"/>						

2 Flights Found.

29. Are registered in the **Flight Control** more than 24,400 airports. If in the creation of a flight, the ICAO code entered does not appear in the database, the user may request the inclusion of the code.
30. To request the inclusion of the ICAO code, place your mouse over the menu "**Flight Control**" and when the list appears click on the "Airports".
31. In the "ICAO Code" field type the ICAO code, in the "Airport City" field type the city from the airport and in the "Country" field type the country.
32. By clicking the "Request Inclusion" button the code will be sent to the site administrator for conference, but will be already available in the database.

ICAO Code:

Airport City:

Country:

33. If the administration of the **Flight Control** can not prove the existence of the airport, both the code and flights related to it will be deleted without notice to the user.
34. To change the company name put the mouse over the menu "**Flight Control**" and when the list appears click the "Change Company Name".
35. The "Company Name" displays the current name of the company.

36. Type in the "New Company Name" field the new company name and click the "Apply" button.

42. Will appear the confirm the creation of new user. Click the "Continue".
43. The user just created now appears in the list on the right side of the page.
44. To change the type of user click on the word "select" on the right of each existing user.
45. Select at the bottom of the type of user who is assigned to the selected user and click the "Change" button.
46. To delete the user click on the word "Select" and click the "Delete" button.
47. In the **Flight Control** users can change their own email and password.

48. To change your email or password put the mouse over the menu "Members" and click the "Change Password / Email".
49. Type in the "Password" field the current password, type the new password into the "New Password" field, then in "Confirm New Password" field and click the "Change Password" button.

The screenshot shows the SPILFRED.COM website interface. At the top, there is a navigation menu with links for Home, Members, Flight Control, SPILFRED, Help, and About. Below the menu, a blue banner reads "CHANGE E-MAIL AND PASSWORD". The main content area is divided into two sections. The first section, "Change Your Password", contains three input fields for "Password", "New Password", and "Confirm New Password", each with a masked password field. Below these fields are two buttons: "Change Password" (highlighted with a red circle) and "Cancel". The second section, "Change Your E-mail", contains a single input field for "New E-mail" and a "Change E-mail" button.

50. After confirming click the "Continue" button.
51. To change the email, type the new address in the "New Mail" field and click the "Change Email" button.
52. A text will be displayed stating that the email was changed.
53. To delete an account with all flights and users, put the mouse over the menu "Members" menu and when the list appears click "Delete Account".
54. Type the name of the Admin user in the "Admin User Name" field and click the "Delete" button (***All users and flights created by this account will be deleted as well***).

For questions, comments and suggestions please send email to: support@spilfred.com. I will try to answer as soon as possible.

I hope that this software is useful to virtual commanders as it was for me.

Good fun and good flights.

Fred Matias
